

## LCARC SKYWARN NET CONTROL SUMMER SCRIPT (09/2024)

SKYWARN is Activated. "This is \_\_\_\_\_ (call sign) Net Control for SKYWARN in contact with the National Weather Service in Jackson, Kentucky. All SKYWARN spotters are requested to check their systems and back up systems at this time."

### **(IF in WATCH mode READ EVERY 30 MINUTES)**

"The National Weather Service has indicated that there is a THREAT for SEVERE WEATHER within the listening area of this repeater. (Read the list of watches if possible) SKYWARN is in Standby mode, and amateurs may use the repeater. Please keep transmissions short with breaks to permit severe weather reports to reach SKYWARN."

### **(IF in WARNING mode READ EVERY 15 MINUTES, BREAKING INTERMITTENTLY FOR WARNINGS AND REPORTS)**

"The National Weather Service has indicated that SEVERE WEATHER IS OCCURRING within the listening area of this repeater. (Read the list of warnings if possible) SKYWARN is currently activated as a directed net."

"All amateurs are encouraged to call SKYWARN with reports of severe weather. When calling SKYWARN Net Control please give your Spotter ID if you have one, call sign, and indicate the exact location where severe weather is occurring. This includes city AND state, nearest town, road, or intersection. Please do not use landmarks. Major roadways are OK."

"The National Weather Service is looking for reports of the following:

1. Tornadoes, funnel clouds, or rotating wall clouds
2. Hail (please give the size as compared to US coins)
3. Wind gusts in excess of 50 miles per hour measured with an anemometer.
4. Flooding of streams, creeks, or rivers out of their banks
5. Roads, or streets made impassable due to water
6. An inch or more of rain accumulation measured in rain gauge
7. Any damage by wind or lightning
8. Downed trees, large branches, or power lines"

"Please do not call SKYWARN Net Control if none of these severe weather events are occurring in your area. Any station experiencing one of these severe weather events call SKYWARN Net Control at this time."

**(Read this portion once during the hourly NCS announcement,  
or as directed by the Net Manager)**

*In the event of a repeater outage on this frequency, our primary backup repeater is 444.6625 + offset pl 107.2hz on TX and RX (KK4WH Whitesburg, KY)*

"This is \_\_\_\_\_(call sign), over."

## LCARC SKYWARN NET CONTROL WINTER SCRIPT (09/2024)

"This is \_\_\_\_\_ (call sign), over."

## LCARC SKYWARN NET CONTROL CLOSING SCRIPT (09/2024)

### Close of the Net

"This is \_\_\_\_\_ (call sign) Net Control for SKYWARN, On behalf of the National Weather Service and the SKYWARN program, we would like to thank the repeater owners for the use of their system and the amateur community for giving SKYWARN traffic priority and for participating in SKYWARN severe weather nets. At this time I am closing the SKYWARN net and turning the repeater back over for normal amateur operator use."
